SAFETY COATINGS TRAFFIC PAINT

Crown USA, Inc. manufactures a full array of pavement marking products including **Waterborne Traffic Paint**. Our Safety Coatings brand traffic paint is available in a variety of colors, durability, and dry time that meet federal and state specifications. We offer high build, fast dry, low-temp, algae resistant, stain resistant, and parking lot paint products that are all held to our high-quality control standards.

COMMON PROPERTIES & BENEFITS

- ◆ Low VOC
- ◆ High Build
 - Cold applied thermoplastic; can be used to refurbish existing thermoplastic lines
 - Can be applied up to 30 mils wet without cracking
 - Can be applied with standard waterborne striping equipment
- ◆ Fast Dry
 - Will dry under high humidity conditions
 - Recommended for sealcoated surfaces, airfields, and highways
- ◆ Low Temp
 - Can be applied at temperatures as low as 35 degrees and rising
 - Meets Fed Spec TT-P-1952F Types I & II
- ◆ Parking Lot Paints
 - Acryset – 100% acrylic “workhorse” parking lot paint
 - Acrymark – 100% acrylic paint with an eggshell finish to resist marks; recommended for heavy traffic areas
- ◆ Algae Resistant & Stain Resistant
 - Built into the paint formulation (one part product; no mixing)
 - Available in TT-P-1952F Type I, II, III specifications
 - Paint can be formulated for either resistance or combined (both algae and stain resistance)
